INDEX

to

GENERAL RADIO EXPERIMENTER
June, 1926 through May, 1929
Vols. 1-3

Acoustic Chart, Correlated
Unsigned (May, 1927)
A. C. Operated Amplifier with a High Quality Power Output, An
A. R. Wilson (November, 1927)
A. C. Operation, Complete . . . a Practical Reality
C. T. Burke (July, 1927)
A. C. Operation, New General Radio Parts For
Unsigned (July, 1927)
A. C. Tubes, Further Data on New
H. W. Lamson (August, 1927)
Adjustable Center Tap Resistance
Unsigned (December, 1927)
Alternating-Current-Operated Radio-Frequency Oscillator, An
J. K. Clapp (April, 1929)
Amateur, A Better Frequency Meter For
J. K. Clapp (March, 1929)
Amateur Bands, Coil Data For
L. B. Root (December, 1928)
Amateur Condenser, a New
C. T. Burke (September, 1928)
Amateur Wavemeter, a New
Unsigned (July, 1926)
Amateurs, Quartz Plates Available to
Unsigned (August, 1926)
Amplifier Ins and Outs
C. T. Burke (June, 1926)
Amplifier, A Phonograph
A. R. Wilson (April, 1928)
Amplifier, What Governs the Power Handling Capacity of
A. R. Wilson (July, 1927)
Amplifier Design, Some Old Principles in Audio
C. T. Burke (October, 1928)
Amplifier Tube, Biasing the, from the Plate Supply Unit
H. W. Lamson (December, 1926)
Amplification, an Effective Method of Measuring
L. B. Root (November, 1926)
Amplification, Power
C. T. Burke (October, 1927)
Announcing a New General Radio Service for Experimenters
Unsigned (June, 1926)
Apology, An
Unsigned (December, 1928)
Artificial Cable Box, An
H. W. Lamson (June, 1928)
Attenuation Networks, Design and Use of
H. W. Lamson (September, 1927)
Audio Frequency Couplers, Plug in System For
Unsigned (June, 1928)

Bargains
Unsigned (August, September, December, 1928)
"B" Battery Eliminator, The
H. W. Lamson (July, 1926)
Battery Elimination, The Status of "A"
C. T. Burke (October, 1926)
Beat Frequency Oscillator, The Type 413
Usigned (April, 1927)
Better Frequency Meter for the Amateur, A
J. K. Clapp (March, 1929)
Biasing the Power Amplifier Tube from the Plate Supply Unit
H. W. Lamson (December, 1926)
Bridge, The Vacuum Tube
H. W. Lamson (October, 1926)
Burke, C. T.
Amplifier Ins and Outs (June, 1926)
Coil Calculations (November, 1926)
Complete A. C. Operation a Practical Reality (July, 1927)
Discussion of Condenser Plate Shapes, A (March, 1927)
Equipment of the Service Laboratory (February, 1928)
Factors Governing the Choice of Power Tubes (December, 1927)
Impedance Adjusting Transformer, The (February, 1928)
Inductance-Capacity-Frequency-Impedance Chart (June, 1928)
Measurement of Direct Capacity (February, 1929)
Mutual Conductance Meter Type 443 (September, 1928)
New Amateur Condenser, A (September, 1928)
New Amateur Wavemeter, A (July, 1928)
New Relay, A (February, 1929)
New Test Oscillator, A (October, 1928)
New Transformers (July, 1928)
Notes on Group Address Systems (September, 1928)
Parallel Plate Feed (April, 1928)
Power Amplification (October, 1927)
Review of Coupling Methods, A (May, 1927)
Silcon vs Nickel in Transformer Design August, 1928)
Some Old Principles in Audio Amplifie Design (October, 1928)
Station Frequency Meter Type 532 (September, 1928)
Status of "A" Battery Elimination, The (October, 1926)
Three-Decade Voltage Divider (February, 1929)
Type 426-A Thermionic Voltmeter (September, 1928)
Cable Box, An Artificial
H. W. Lamson (June, 1928)
Capacity Bridge, A New
Unsigned (February, 1927)
Capacity Unbalance Bridge for Cable Testing, A
J. W. Horton (May, 1929)
Catalog E
Unsigned (September, 1928)
Characteristic Curves of Filters
Unsigned (February, 1929)
Characteristics of Electrical Pickups
A. R. Wilson (October, 1928)
Chart, Inductance-Capacity-Frequency-Impedance
C. T. Burke (June, 1928)
Clapp, J. K. Joins Staff
Unsigned (July, 1928)
Clapp, J. K.
An Alternating-Current-Operated Radio-Frequency Oscillator (April, 1929)

Better Frequency Meter for the Amateur, A (March, 1929)
Frequency Determination (March, 1929)
New Frequency Standard, A (April, 1929)
Coil Calculations
C. T. Burke (November, 1926)
Coil Data for Amateur Bands
L. B. Root (December, 1928)
Coil Resistances, A Study of at 40 Meters
L. B. Root (February, 1927)
Coils for Types 389 and 489 Magnetostriction Oscillators
Unsigned (February, 1929)
Complete A. C. Operation a Practical Reality
C. T. Burke (July, 1927)
Condenser Licenses
Unsigned (April, 1928)
Condenser Plate License
Unsigned (April, 1928)
Condenser Plate Shapes, A Discussion of
C. T. Burke (March, 1927)
Condensers, Variable Air for Use with High Voltages
Unsigned (May, 1929)
Correlated Acoustic Chart
Unsigned (May, 1927)
Coupling Methods, A Review of
C. T. Burke (May, 1927)
Definition of the Transmission Unit
H. W. Lamson (October, 1927)
Design and Testing of Plate Supply Devices: Part I - Design
P. K. McElroy (December, 1926)
Design and Testing of Plate Supply Devices: Part II - Testing
P. K. McElroy (January, 1927)
Design and Use of Attenuation Networks
H. W. Lamson (September, 1927)
Design and Use of the Radio Frequency Chode, The
H. W. Lamson (June, 1927)
Design and Use of the Speaker Filter, The
H. W. Lamson (August, 1926)
Development and Use of the Hydrophone, The
H. W. Lamson (January, 1928) (May, 1928) (October, 1928)
Direct Capacity, Measurement of
C. T. Burke (February, 1929)
Direct to Consumer Policy, A
Unsigned (July, 1928)
Discussion of Condenser Plate Shapes, A
C. T. Burke (March, 1927)
Double String Element, A
H. W. Lamson (December, 1928)
Dr. Hull Joins Our Staff
Unsigned (December, 1927)
Dr. Hull Returns to Boonton
Unsigned (January, 1929)
Effective Method of Measuring Amplification, An
L. B. Root (November, 1926)
Electrical Pickups, Characteristics of
A. R. Wilson (October, 1928)
Electrical Transmission, Units of
J. W. Horton (January, 1929)
Equalizer Panels
Unsigned (April, 1928)

Equipment of the Service Laboratory
C. T. Burke (February, 1928)
Experimenter, The, to Have a New Editor
Unsigned (February, 1929)
Factors Concerning the Use of the Type UX 250 Power Amplifier Tube
A. R. Wilson (March, 1928)
Factors Governing the Choice of Power Tubes
C. T. Burke (December, 1927)
Fader, the Vitaphone
Unsigned (January, 1927)
Filter Sections, Type 330
H. W. Lamson (August, 1928)
Filters, Characteristic Curves of
Unsigned (February, 1929)
Frequency Determination
J. K. Clapp (March, 1929)
Frequency Meter for the Amateur, A
J. K. Clapp (March, 1929)
Frequency Standard, A New
J. K. Clapp (April, 1929)
Further Data on New A. C. Tubes
H. W. Lamson (August, 1927)
G. R. Engineers Visit Europe
Unsigned (September, 1928)
Group Address Systems
C. T. Burke (September, 1928)
Has Your Subscription Expired
Unsigned (October, 1928)
High-Voltage Plate-Supply Units
A. R. Wilson (November, 1928)
Horton, J. W., Our New Chief Engineer
Unsigned (November, 1928)
Horton, J. W.
Capacity Unbalance Bridge for Cable Testing, A (May, 1929)
Units of Electrical Transmission (January, 1929)
How and Why the Talkies
H. W. Lamson (December, 1928)
How and Why the Talkies: Part II
H. W. Lamson (January, 1929)
How Good is "Good?"
Unsigned (March, 1927)
Hydrophone, the Development and Use of the
H. W. Lamson (January, 1928) (May, 1928) (October, 1928)
Impedance Adjusting Transformer, The
C. T. Burke (February, 1928)
Inductance-Capacity-Frequency-Impedance Chart
C. T. Burke (June, 1928)
Instrument for Making Graphic Record of Signal Strength Variation, An
Unsigned (April, 1927)
Johns Hopkins Graduate Joins Engineering Staff
Unsigned (January, 1929)
Laboratory Amplifier, the Type 415
Unsigned (March, 1927)
Lamson, H. W.
An Artificial Cable Box (June, 1928)
"B" Battery Eliminator, The (July, 1926)
Biasing the Power Amplifier Tube from the Plate Supply Unit
(December, 1926)

Definition of the Transmission Unit (October, 1927)
Design and Use of Attenuation Networks (September, 1927)
Design and Use of the Radio Frequency Choke, The (June, 1927)
Design and Use of the Speaker Filter, The (August, 1926)
Development and Use of the Hydrophone (January, 1928) (May, 1928) (October, 1928)
Double String Element, A (December, 1928)
Further Data on New A. C. Tubes (August, 1927)
How and Why the Talkies (December, 1928) (January, 1929)
Magnetostriction Oscillators (June, 1928) (August, 1928)
New Tubes for Old (April, 1927)
Synchronometer, The (November, 1927)
Type 330 Filter Sections (August, 1928)
Vacuum Tube Bridge, The (October, 1926)

Magnetostriction Oscillators
H. W. Lamson (June, 1928) (August, 1928)

Magnetostriction Oscillators, Coils for Types 389 and 489
Unsigned (February, 1929)

Mass Wavemeter Calibration
Unsigned (February, 1927)

McElroy, P. K.
Design and Testing of Plate Supply Devices: Part I - Design (December, 1926)
Design and Testing of Plate Supply Devices: Part II - Testing (January, 1927)
Unique Method of Voltage Control Adapts Unit to Any Standard Type of Receiver (September, 1927)

Measurement of Direct Capacity
C. T. Burke (February, 1929)

Modifications of the Type 361-A Vacuum Tube Bridge
Unsigned (February, 1928)

Mutual Conductance Meter, Type 443
C. T. Burke (September, 1928)

New Amateur Condenser, A
C. T. Burke (September, 1928)

New Amateur Wavemeter, A
Unsigned (July, 1925)

New Amateur Wavemeter, A
C. T. Burke (July, 1928)

New Capacity Bridge, A
Unsigned (February, 1927)

New Construction Literature on the Rectron and Raytheon Plate Supply and Power Amplifier Units Now Ready
Unsigned (August, 1926)

New Frequency Standard, A
J. K. Clapp (April, 1929)

New General Radio Apparatus (Type 446)
Unsigned (December, 1927)

New General Radio Apparatus (Type 214-A)
Unsigned (January, 1928)

New General Radio Apparatus
Unsigned (March, 1928)

New General Radio Parts for A. C. Operation
Unsigned (July, 1927)

New Junior Engineer, A
Unsigned (October, 1928)

New Laboratory Catalog
Unsigned (October, 1928)

New Relay, A
C. T. Burke (February, 1929)

New Test Oscillator, A
C. T. Burke (October, 1928)
New Transformers
C. T. Burke (July, 1928)
New Tube and a New Transformer, A
Unsigned (July, 1926)
New Tubes for Old
H. W. Lamson (April, 1927)
New 600,000-ohm Voltage Divider, A
Unsigned (December, 1928)
Notes on Group Address Systems
C. T. Burke (September, 1928)
Notice of Omission of September, 1926 Issue
Unsigned (October, 1926)
Notice to Radio Editors (permission to reprint)
Unsigned (December, 1926)
Oscillator, An Alternating-Current-Operated Radio-Frequency
J. K. Clapp (April, 1929)
Parallel Plate Feed
C. T. Burke (April, 1928)
Permalloy
A. E. Thiessen (May, 1929)
Phonograph Amplifier, A
A. R. Wilson (April, 1928)
Plate Supply and Power Amplifier Systems
A. R. Wilson (January, 1928)
Plate Supply and Power Amplifier Units, New Construction Literature on the Rectron and Raytheon Now Ready
Unsigned (August, 1926)
Plate Supply Devices, Design and Testing of, Part I - Design
P. K. McElroy (December, 1926)
Plate Supply Devices, Design and Testing of, Part II - Testing
P. K. McElroy (January, 1927)
Plate Supply Units, High-Voltage
A. R. Wilson (November, 1928)
Plate Supply Units, Voltage Regulation of
Unsigned (March, 1927)
Plug in System for Audio Frequency Couplers
Unsigned (June, 1928)
Power Amplification
C. T. Burke (October, 1927)
Power Amplifier and Plate Supply, New Construction Literature on the Rectron and Raytheon Now Ready
Unsigned (August, 1926)
Power Amplifier Systems, Plate Supply and
A. R. Wilson (January, 1928)
Power Amplifier Tube, Factors Concerning the Use of the Type UX 250
A. R. Wilson (March, 1928)
Power Amplifier, What Shall I Use in My?
Unsigned (October, 1926)
Power Transformers for the 245-Type Tubes
Unsigned (May, 1929)
Power Tubes, Factors Governing the Choice of
C. T. Burke (December, 1927)
Proper Position for Volume Control
Unsigned (June, 1927)
Quartz Plates Available to Amateurs
Unsigned (August, 1926)

Radio Frequency Choke, The Design and Use of
H. W. Lamson (June, 1927)
Radio Frequency Oscillator, An Alternating Current
J. K. Clapp (April, 1929)
Radio Receivers, Rating of
Unsigned (April, 1928)
Rating of Radio Receivers
Unsigned (November, 1928)
Relay, A New
C. T. Burke (February, 1929)
Resistance Materials, Temperature Coefficient in
C. C. Swift (February, 1928)
Review of Coupling Methods, A
C. T. Burke (May, 1927)
"Rock-Bottom" Standard, A
Unsigned (December, 1926)
Root, L. B.
Coil Data for Amateur Bands (December, 1928)
Effective Method of Measuring Amplification, An (November, 1926)
Study of Coil Resistances at 40 Meters, A (February, 1927)
Service Laboratory, Equipment of the
C. T. Burke (February, 1928)
Service Table for Types 400 and 405 Units
Unsigned (January, 1927)
Signal Strength Variation, An Instrument for Making Graphic Record of
Unsigned (April, 1927)
Silcon vs Nickel in Transformer Design
C. T. Burke (August, 1928)
Simple Method for Increasing Voltage at 45 V Tap Where Current Drain is Heavy
Unsigned (December, 1926)
Some Old Principles in Audio Amplifier Design
C. T. Burke (October, 1928)
Speaker Filter for the 245-type Tube, A
Unsigned (April, 1929)
Speaker Filter, The Design and Use of
H. W. Lamson (August, 1926)
Standard, A "Rock Bottom"
Unsigned (December, 1926)
Station Frequency Meter Type 532
C. T. Burke (September, 1928)
Status of "A" Battery Elimination, The
C. T. Burke (October, 1926)
Study of Coil Resistances at 40 Meters, A
L. B. Root (February, 1927)
Swift, C. C.
Temperature Coefficient in Resistance Materials (February, 1928)
Synchronometer, The
H. W. Lamson (November, 1927)
Synchronous Motor, The Type 411
Unsigned (May, 1927)
Talkies, How and Why the
H. W. Lamson (December, 1928) (January, 1929)
Television
Unsigned (January, 1929)
Temperature Coefficient in Resistance Materials
C. C. Swift (February, 1928)
Test Oscillator, A New
C. T. Burke (October, 1928)
Thermionic Voltmeter, Type 426-A
C. T. Burke (September, 1928)

Thiessen, A. E.
Permalloy (May, 1929)
Three-Decade Voltage Divider
C. T. Burke (February, 1929)
Transformer Design, Silcon vs Nickel in
C. T. Burke (August, 1928)
Transformer, The Impedance Adjusting
C. T. Burke (February, 1928)
Transformer, A New and a New Tube
Unsigned (July, 1926)
Transformers, New
C. T. Burke (July, 1928)
Transmission Unit, Definition of the
H. W. Lamson (October, 1927)
Type 214-A, New General Radio Apparatus
Unsigned (January, 1928)
Type UX-250 Power Amplifier Tube, Factors Concerning the Use of the
A. R. Wilson (March, 1928)
Type 330 Filter Sections
H. W. Lamson (August, 1928)
Type 361-A Vacuum Tube Bridge, Modifications of
Unsigned (February, 1928)
Types 389 and 489 Magnetostriction Oscillators, Coils for
Unsigned (February, 1929)
Types 400 and 405 Units, Service Table for
Unsigned (January, 1927)
Type 411 Synchronous Motor, The
Unsigned (May, 1927)
Type 413 Beat-Frequency Oscillator, The
Unsigned (April, 1927)
Type 415 Laboratory Amplifier, The
Unsigned (March, 1927)
Type 426-A Thermionic Voltmeter
C. T. Burke (September, 1928)
Type 443 Mutual Conductance Meter
C. T. Burke (September, 1928)
Type 446, New General Radio Apparatus
Unsigned (December, 1927)
Type 458 5-Meter Wavemeter
Unsigned (June, 1927)
Types 489 and 389 Magnetostriction Oscillators, Coils for
Unsigned (February, 1929)
Type 532 Station Frequency Meter
C. T. Burke (September, 1928)
245-type Tubes, Power Transformers for Unsigned (May, 1929)
245-type Unsigned (May, 1929)
245-type Tube, a Speaker Filter for
Unsigned (April, 1929)
Unique Method of Voltage Control Adapts Unit to any Standard Type of Receiver
P. K. McElroy (September, 1927)
Units of Electrical Transmission
J. W. Horton (January, 1929)
Vacuum Tube Bridge, The
H. W. Lamson (October, 1926)
Vacuum Tube Bridge, Modifications of the Type 361-A
Unsigned (February, 1928)
Vacuum Tube Data Table
Unsigned (December, 1927)

Vacuum Tube Data Table (Correct to February 1, 1927)
Unsigned (February, 1927)
Variable Air Condensers for Use with High Voltages
Unsigned (May, 1929)
Vitaphone Fader, The
Unsigned (January, 1927)
Voltage Divider, a New 600,000-ohm
Unsigned (December, 1928)
Voltage Divider, Three-Decade
C. T. Burke (February, 1929)
Voltage Regulation of Plate Supply Units
Unsigned (March, 1927)
Volume Control, Proper Position for
Unsigned (June, 1927)
Wavemeter, A New Amateur
Unsigned (July, 1926)
Wavemeter, the Type 458 5-Meter
Unsigned (June, 1927)
What Governs the Power Handling Capacity of an Amplifier
A. R. Wilson (July, 1927)
What Tube Shall I Use in My Power Amplifier?
Unsigned (October, 1926)
Wilson, A. R.
An A. C. Operated Amplifier with a High Quality Power Output (November, 1927)
Characteristics of Electrical Pickups (October, 1928)
Factors Concerning the Use of the Type UX 250 Power Amplifier Tube (March, 1928)
High-Voltage Plate-Supply Units (November, 1928)
Phonograph Amplifier, A (April, 1928)
Plate Supply and Power Amplification Systems (January, 1928)
What Governs the Power Handling Capacity of an Amplifier (July, 1927)
